

VST Bridge for WinAmp compatible Media Player

Version 1.1.6

Welcome

Thank you for downloading this fine plug-in. **VST Bridge for WinAmp compatible Media Player** allows you to host VST plugins in any WinAmp compatible media player.

In order to get the most out of the **VST Bridge**, please spend a few moments reading this brief manual.

License

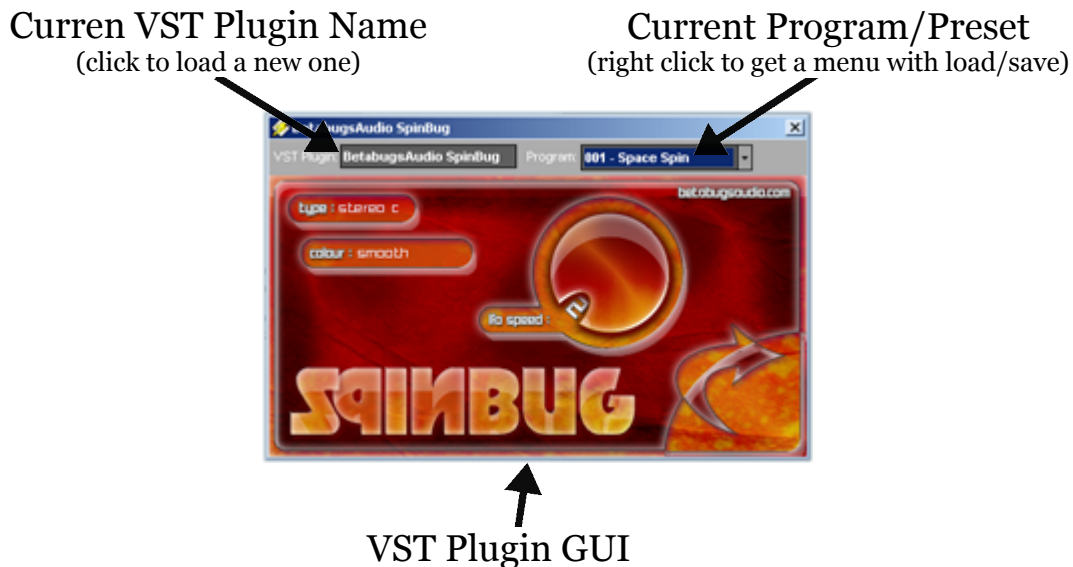

The pre-compiled **VST Bridge for WinAmp compatible Media Player** has a very simple license:

1. **VST Bridge for WinAmp compatible Media Player** is freeware. This means that you are free to distribute it, give it to friends, or otherwise share it around. However, only the entire unaltered archive, including this document, may be re-distributed.
2. Copyright of the code and the finished plug-in remain the property of the *Delphi ASIO & VST Project* and namely *Christian-W. Budde*.
3. This plug-in is provided at no cost; therefore the author *Christian-W. Budde* assume no responsibility for any negative effects that may occur to the end user or the equipment used to run the plug-in.
4. Magazine editors are welcome to include the plug-in on cover mount discs or similar media; however, I request that am informed about it via [e-mail](#). A few copies of the publication are always appreciated, but not expected.

User Interface

The user interface shows the currently loaded plugin name, the available programs/presets and the GUI provided by the VST plugin itself.

Here is a commented screenshot:

On the top of the bridge the name of the currently loaded plugin is displayed. By clicking this display box you can load another VST plugin.

On the right all available programs/presets are listed within a combo box. Click on the right to choose any. By right clicking on that control a menu pops up that allows you to load/save the program/preset.

Below the GUI of the plugin is displayed it is up to the plugin developer what can be tweaked here.

Feedback / Bug Reports

I am always eager to hear feedback or have bugs reported. The easiest way is to send me a mail to: Christian@aixcoustic.com

Furthermore feel free to download the core source code (widget code not included). It can be found in the [Delphi ASIO & VST Project](http://sourceforge.net) at sourceforge.net.

Version History
